PERSONAL PROJECTS

Many of my personal artworks showcase the integration of previously static artworks with HTML/CSS + JS. The result is a dynamic, procedural, and in some cases, interactive experiences with my illustrations. By combining .png images or .mp4 videos and layering them with the scripts and code, these pieces demonstrate the wonders of combining art and logic.

HTML/CSS + JAVASCRIPT

Personal Portoflio Website

asukabaka.github.io/index.html

- Portfolio website showcasing artwork with clear UI interface and compelling aesthetic.
- Website features responsive design, and implimentation of Javascript lazyloading for optimal loading times.

Welcome to the City of Expired Tear Gas

asukabaka.github.io/umbrella_girl.html

- Character illustration with inspiration from recent political turmoil in Hong Kong.
- Artwork explores contrast with greyscale/pink, traditional/high-tech, flesh/prosthetics, curves/harsh mechanical shapes.
- Artwork demonstrates unique blend of MPEG4 composited on 2D artwork and combined with Javascript code for a visually spectacular and interactive piece.

PERSONAL ILLUSTRATIONS

JDN500F

asukabaka.github.io/jdn.html

- Futuristic design of current day Suzuki GS500F.
- Special attention given to making the motorcycle and character blend in and become a part of the background.
- Environment is futuristic reimagining of iconic Shibuya Crossing in Tokyo, Japan.

Private Investigation Agency

asukabaka.github.io/pt_investigation_agency.html

- Futuristic cyberpunk reimagining of the discontinued Honda S2000.
- Design of the car is notable for intergrating modern day motifs from Honda and Acura designs.

No Impossible Frontiers

asukabaka.github.io/kirijo_dynamics_promo.html

- Fictional promotional image focuses on mechanics and proportions of the hand.
- Special consideration given to designing the look and aesthetic of a "benevolent" cyberpunk mega-corporation.
